

I am a truck driver, this service helps us as a whole. The local stations talk about nothing that helps traffic . You have your local air watch, but if you don't know the city you don't know the radio stations. With my XM radio service that I and over a Million other customers choose to pay for each month, give to the minute traffic reports and keeps the driving public more informed. Further more the real problem isn't that you people don't want us to have the information the broadcasting association are greedy people and don't like to lose control of a market. People like this are the same people that want to see God taken out of the Pledge of Allegiance, The schools, Off of money, and completely out of our life. These kind of people are the same people that would like to change everything in our constituton, Please help us keep our rights.
